

G76 Vocal Coaching

The Discovery atelier intends to inform the singers about the anatomy of the voice through singing exercises. There will also be a video to show the larynx and how it works, and anatomical charts as well.

The Atelier will propose breathing exercises, in order to explain the importance of good posture, and lots of exercises for good diction. The aim is also to show how to voice a choir, getting the best possible blend from the singers so that no individual voice overpowers others in the choir.

It will be possible to work with individual singers too.
