

Chiusa di Pesio (CN) - Rifugio Pian delle Gorre

Pian delle Gorre

Valle Pesio, surrounded by the Alps, has an incredible variety of flora and fauna, due to the climatic influences of the Mediterranean sea. The Maraguarès, a high karstic mountain, dominates the valley. Many sports fans can enjoy a natural landscape, enriched by many hiking and Speleological activities on various routes, including food and wine itineraries. Along the way, there are ruins and remains, traces of the agricultural and pastoral traditions of the past. You can refresh after a long walk in the refuges that populate the valley, as the Rifugio Pian delle Gorre, which offers interesting meetings and concerts, in addition to a precious access to woods and valleys.
