

G31 A Choral Floyd Mob

Pink Floyd for choir. The Pink Floyd 1973 masterpiece "The dark side of the moon" remained on the Billboard chart for 741 weeks and is one of the best selling albums of all time. We will explore ways of arranging pop music for choir and recorded singback, based on the original studio recording, and focusing both on the eyes and ears of the audience. Kjetil Aamann is a former rock musician who loves psychedelic music on big stages.

**The atelier will take place in the Reggia di Venaria Reale, where the festival will be hosted on that day, and it could have a short afternoon performance there.*

*** Shuttle to Venaria included.*
